

EJERCICIO F. FIND BITS

Archivo: find.cpp find.java

Autor: Jaider Bautista Rodríguez – Estudiante Universidad de la Amazonia

Given a non-negative integer N , print its binary representation. The output must not contain any leading zeros.

Decimal	Binary	Decimal	Binary
1	1	6	110
2	10	7	111
3	11	8	1000
4	100	9	1001
5	101	10	1010

Input:

The first line contains an integer T ($1 \leq T \leq 50$), which indicates the number of test cases. Each of the following lines contains an integer N ($1 \leq N \leq 10$),

Output:

For each test case, print a single line containing the binary representation of N without leading zeros.

Input	Output
3	1
1	111
7	1010
10
